Stunning Kitchen Experience April 2022

Maitre Cuisine Pura

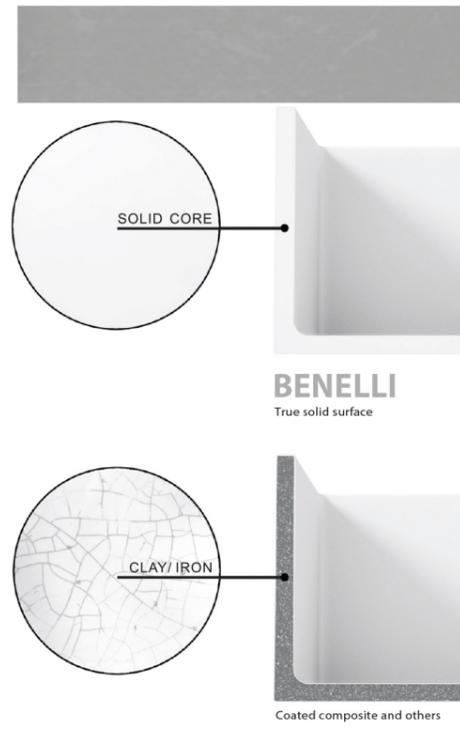

Benelli Global's Maitre Cuisine Pura butler sink range is made from high quality Solid Surface material.

Solid Surface is a man made, non porous, low maintenance & hygienic material. It's designed to have the feel of silk, the quality and appeal of natural stone and the hygienic properties of stainless steel. It is easy to care for, incredibly stylish and offers endless design flexibility. It's no wonder this incredible substance is fast becoming the leader in commercial & residential design.

Mineral casting is a material mixture of natural stone powder resin. Its special properties, such as the high temperature stability, large design possibilities make mineral casting a high-quality and flexible material.

Benelli Pura Kitchen sinks are made of natural stone powder and polyester resin. The great advantage over conventional material is the particularly large design possibility. By refining the surface with a gelcode layer, these sinks are equipped with a matt white exterior. The refined mineral casting is resistant and easy to care for.

*Non-porous, solid construction core resists fire, chemicals, germs and stains.

BENELLI
True Solid Surface

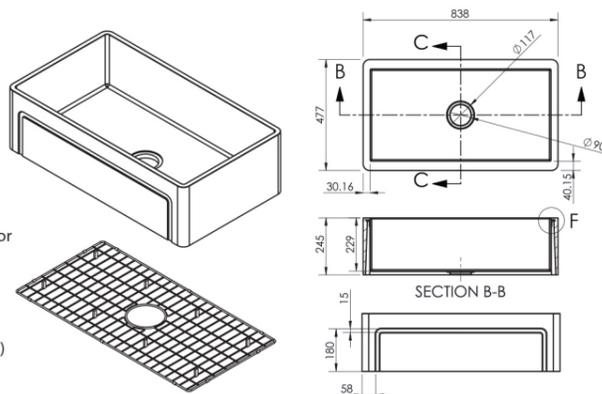

Note: We always recommend the cabinet maker and stone provider has the actual sink with them to measure before making cabinetry or cutting stone. Use of Epoxies on Benelli PURA Solid Surface Sinks will void manufacturer's warranty. If installing stone over the sink, ensure stone and sink are supported independently of each other.
